Metabolism of Terpenoids and Polyketides
Biosynthesis of Other Secondary Metabolites
Biosynthesis of ansamycins
Amino sugar and nucleotide sugar metabolism
Strach and sucrose metabolism
Butirosin and neomycin biosynthesis
Indole diterpene alkaloid biosynthesis
Streptomycin biosynthesis
Biosynthesis of type II polyketide backbone
Pentose phosphate pathway
Benzoxazinoid biosynthesis
Purine metabolism
Caffeine metabolism
Biosynthesis of type II polyketide products
[B] Polyketides and nonribosomal peptides
Ascorbate and aldarate metabolism
Puromycin biosynthesis
Biosynthesis of vancomycin group antibiotics
Nonribosomal peptide structures
Cutine, suberine and wax biosynthesis
Glycolysis / Gluconeogenesis
Phosphonate and phosphinate metabolism
Acridone alkaloid biosynthesis
Betalain biosynthesis
Isoquinoline alkaloid biosynthesis
Carbapenem biosynthesis
Biosynthesis of 12-, 14- and 16-membered macrolides
Type I polyketide structures
Polyketide sugar unit biosynthesis
Indole alkaloid biosynthesis
Terpenoid backbone biosynthesis
Phenylalanine, tyrosine and tryptophan biosynthesis
Tetracycline biosynthesis
Biosynthesis of siderophore group nonribosomal peptides
Novobiocin biosynthesis
Geraniol degradation
Zeatin biosynthesis
Isoflavonoid biosynthesis
Monoterpenoid biosynthesis
Stilbenoid, diarylheptanoid and gingerol biosynthesis
Sesquiterpenoid and triterpenoid biosynthesis
Phenylpropanoid biosynthesis
Arginine and proline metabolism
Clavulanic acid biosynthesis
Glycine, serine and threonine metabolism
Citrate cycle (TCA cycle)
Limonene and pinene degradation
Steroid biosynthesis
Diterpenoid biosynthesis
Lysine biosynthesis
Cysteine and methionine metabolism
Glyoxylate and dicarboxylate metabolism
Anthocyanin biosynthesis
Insect hormone biosynthesis
Flavone and flavonol biosynthesis
Valine, leucine and isoleucine biosynthesis
Flavonoid biosynthesis
Cyanoamino acid metabolism
Porphyrin and chlorophyll metabolism
Alanine, aspartate and glutamate metabolism
beta-Lactam resistance
Valine, leucine and isoleucine degradation
Ubiquinone and other terpenoid-quinone biosynthesis
Penicillin and cephalosporin biosynthesis
Tropane, piperidine and pyridine alkaloid biosynthesis
Brassinosteroid biosynthesis
Carotenoid biosynthesis
[B] Phytochemical compounds
Pantothenate and CoA biosynthesis
Histidine metabolism
Glucosinolate biosynthesis
